Notes:

Methods

- Majority:** If 50% of workers or more within a labor group earn the same wage/fringe benefit, this becomes the prevailing wage/fringe benefit for the labor group in the respective district. If two different wages/benefits each account for 50% for a labor group within a district, a weighted average is performed.
 - Significant Minority:** If 30% of workers or more within a labor group earn the same wage, this becomes the prevailing wage for the labor group in the respective district. If two different wages each account for 30% for a labor group within a district, a weighted average is performed. This method is not used for benefits.
 - Weighted Average:** If no significant minority exists for a wage/fringe benefit, the prevailing wage/fringe benefit is calculated as $\{(\text{Total Hourly Wage or Fringe Benefit}) \times (\text{Number of Workers})\} + \{(\text{Total Wages Or Benefits Paid}) / (\text{Hours Worked})\} / 2$.
 - Moving Average Wage:** Data was received for all occupations. If 50% or more of reported workers were party to a CBA, current CBA wages and benefits were used (incl. only benefit levels for health, pension, vacation and apprentice training).
- Highlighted sections indicate trades where skill adjustment may be necessary to ensure higher skilled positions are paid at least equal to lower skilled occupations.
