PROVIDER BULLETIN

TOPIC: Viagra, Cialis, Levitra

Published by Wyoming Workers' Compensation Medical Case Management Unit

December 17, 2014

Based on review of current literature, there is no difference in the mechanism of action between Viagra, Cialis, or Levitra. The Division will pay for only one of these medications. The provider must document how the erectile dysfunction is related to the work injury.

Viagra, Cialis, or Levitra will not be approved if prescribed in conjunction with testosterone products. These medications are not indicated in the treatment of opioid associated androgen deficiency (OPIAD).
