PROVIDER BULLETIN

TOPIC: Compound Creams

Published by Wyoming Workers' Compensation Medical Case Management Unit
October 21, 2015

In December, 2014 the Medical Commission reviewed the use of compound creams and medications. Based on review of the evidence at that time, the panel recommended that the only approved prescribed compound creams are diclofenac (Voltaren) and Lidocaine.

On 8-12-15, additional information was submitted to the Division by a Pharm D. After review of the additional information there is no evidence that the decision of December, 2014 should be changed; i.e., the only approved prescribed creams are diclofenac (Voltaren) and Lidocaine.

The Division will continue to approve the use of diclofenac and lidocaine topically but as separate prescriptions. All bills for the compounding of these medications will be denied.
