

February 1, 2017

Dr. John Doe
123 Blank Street
Anywhere, US 12345

This notice is to inform you that Wyoming Workers' Compensation has partnered with CorVel Corporation for prescription benefit management, **effective March 1, 2017**. The pharmacy benefit applies to all eligible workers who are employed in the state of Wyoming. Injured workers will present a pharmacy card at the dispensing pharmacy and prescriptions are processed electronically. If an injured worker does not have a card (a new injury or lost card), please instruct them to call **CorVel Pharmacy Solutions at 1-800-563-8438**. All workers should obtain their medication from a local pharmacy or through CVS Caremark Mail Order Pharmacy. We have included mail order fax forms for your convenience.

A list of approved workers' compensation medications is provided for your convenience. These formulary medications have been approved by Wyoming Workers' Compensation and should be used strictly to treat work related injuries. These approved medications will pay at the pharmacy for your patient. The formulary list includes generic medications only. If a non-formulary medication is medically necessary for your claimant's treatment, the medication will require prior authorization from Wyoming Workers' Compensation claims staff. *CorVel will handle this for you as follows:*

When the injured worker presents the non-formulary prescription at the pharmacy, a message will instruct the pharmacy to call CorVel Pharmacy for prior authorization. CorVel will contact the claims analyst for approval. On occasion, the claims staff will request a Letter of Medical Necessity which will be faxed to your office (examples included). The drug will not be denied until a final decision is made from the claims staff. CorVel will notify the dispensing pharmacy of the decision, whether the medication is allowed or denied.

Please feel free to call CorVel Pharmacy Solutions at 1-800-563-8438 if you have any questions.

CorVel will provide Pharmacy Management effective March 1, 2017.

Sincerely,

CorVel Pharmacy Solutions
