

Fostering a culture of safety in the workplace questions

Q: Is the product Vital Oxide a recommended disinfectant against COVID-19?

A: We recommend looking online at the EPA's website -- search for EPA recommended disinfectant. The EPA list has chemicals and a list of products that work against COVID-19. This is available on DWS OSHA website. <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2-covid-19>

According to the EPA's page (https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2-covid-19#filter_col1), Vital Oxide is effective if the disinfecting directions are followed as they are recommended for Adenovirus and Canine parvovirus.

List N: Products with Emerging Viral Pathogens AND Human Coronavirus claims for use against SARS-CoV-2

EPA Registration Number	Active Ingredient(s)	Product Name	To kill SARS-CoV-2 (COVID-19), follow disinfection directions for the following virus(es)	Contact Time (in minutes)
 82972-1	Chlorine dioxide; Quaternary ammonium	Vital Oxide	Adenovirus; Canine parvovirus	10
